

DURGAPRASAD KARRI

SENIOR NETWORK SECURITY ENGINEER | DDOS & WAF SPECIALIST

Rajahmundry, India | Open to Relocation | +91 7673912494 | durgaprasadkarri713@gmail.com

PROFESSIONAL SUMMARY

Network Security Engineer with 6+ years of experience specializing in DDoS mitigation, WAF security, network security operations and incident response across enterprise, hybrid-cloud and on-prem environments. Hands-on expertise with NETSCOUT Arbor Sightline/TMS, Radware DefensePro and Radware WAF, BGP Flowspec, RTBH, GRE tunneling, traffic diversion, PCAP-level analysis and SIEM platforms. Proven experience mitigating attacks exceeding 1 Tbps, supporting protection for 250+ enterprise applications with 99.9% SLA availability, and reducing detection false positives by 30% through policy and profile tuning. Experienced in OWASP Top 10 protection, application-layer DDoS, bot mitigation, rate limiting and cross-functional incident coordination.

CORE TECHNICAL SKILLS

DDoS Protection & Mitigation: NETSCOUT Arbor Sightline, Arbor TMS, Radware DefensePro; volumetric, protocol and application-layer DDoS; traffic anomaly detection; mitigation policy tuning

DDoS Attack Techniques: UDP/TCP floods, SYN floods, DNS attacks, HTTP floods and slow attacks

Routing & Traffic Diversion: BGP, BGP Flowspec, RTBH, GRE tunnels, traffic diversion, ACLs and DNS protection

WAF & Application Security: Radware WAF, F5 WAF, OWASP Top 10, SQL injection, XSS, command injection, API security, rate limiting, bot mitigation and credential-stuffing defense

Traffic & Incident Analysis: PCAP analysis, Wireshark, packet-level inspection, IOC extraction, incident response and RCA documentation

Network Security: Firewalls, NAT, ACLs, VPNs, load balancers, SSL inspection, DNS and hybrid/on-prem network security

SIEM & Security Operations: Splunk, IBM QRadar, Elastic SIEM, alert triage, security investigations and threat correlation

Additional / Working Knowledge: Azure networking, CDN security, SPF/DKIM/DMARC, CrowdStrike Falcon, Infoblox DNS and Proofpoint

PROFESSIONAL EXPERIENCE

Network Security Engineer (DDoS) | Tata Communications Ltd

03/2026 – Present | Chennai

- Monitor and mitigate enterprise DDoS attacks using Radware DefensePro and NETSCOUT Arbor across volumetric, protocol and application-layer attack scenarios, supporting service availability and SLA commitments.
- Perform real-time traffic analysis to identify attack sources, vectors and patterns, coordinating mitigation activities with SOC, Backbone and NOC teams during high-severity incidents.
- Configure and troubleshoot DDoS mitigation controls including ACLs, DNS protection, traffic diversion, GRE tunnels and BGP routing controls.
- Onboard new enterprise customers onto DDoS protection platforms and tune detection policies to improve accuracy and reduce false positives.
- Prepare customer-facing incident reports and Root Cause Analysis (RCA) documentation for security events.

Network Security Engineer (DDoS) | Verizon

04/2024 – 03/2026 | Hyderabad

- Designed and implemented DDoS mitigation strategies across hybrid-cloud and on-prem environments using NETSCOUT Arbor, defending against attacks exceeding 1 Tbps.
- Applied BGP Flowspec and RTBH filtering to rapidly block malicious traffic at scale during large volumetric attacks.
- Tuned Arbor detection profiles and mitigation policies, reducing false positives by 30% while improving detection accuracy.
- Performed PCAP-level packet inspection and traffic analysis to identify attack signatures, validate attack vectors and optimize mitigation policies.
- Investigated phishing and domain-spoofing threats using SPF/DKIM/DMARC validation and correlated malicious DNS activity with threat intelligence.
- Delivered monthly operational reports covering DDoS trends, mitigation effectiveness and SLA performance to stakeholders.

Security Analyst (ERT) | Radware

11/2022 – 03/2024 | Chennai

- Configured and optimized Radware WAF policies protecting enterprise web portals and APIs against OWASP Top 10 threats including SQL injection, XSS and command injection.
- Implemented rate limiting, behavioral analysis and bot detection controls to mitigate credential-stuffing and web-scraping attacks.
- Investigated application-layer DDoS attacks including HTTP floods and slow attacks and deployed targeted mitigation rules.
- Integrated WAF protection with load balancers, SSL inspection and Arbor DDoS protection to strengthen layered application defense.
- Performed false-positive analysis and rule tuning to balance security controls with application availability and accessibility.

SOC Analyst | Cyient

09/2017 – 06/2022 | Hyderabad

- Triaged 500+ daily security alerts across Splunk, IBM QRadar and Elastic SIEM platforms, maintaining 98% SLA compliance.

- Investigated DDoS, phishing and web-application security incidents and extracted IOCs including malicious IPs, domains and file hashes to support threat mitigation.
- Supported firewall policy review covering NAT and ACLs and validated Layer-7 load balancer configurations, SSL inspection and backend health checks.
- Configured and maintained security tooling including antivirus, intrusion detection and encryption technologies.

CERTIFICATIONS

- CompTIA Security+ — In Progress (Exam Scheduled)
- ISO 27001 Awareness

EDUCATION

B.Tech, Mechanical Engineering — Sriprakash College of Technology (JNTUK), Rajahmundry, Andhra Pradesh | 2015
